

## About Us

We are a queer community defense collective and Communist organization operating in the American empire. We are anti-fascists fighting for trans and queer liberation and the unfringed right of the working and oppressed masses to arm themselves. Our primary goals, [as stated in our manifesto](#), are:

1. To train, arm, and organize the trans and queer masses for their defense against fascism;
2. To provide secondary and back-up systems of mutual aid for HRT (hormone replacement therapy);
3. And to provide a political education to our community.

In addition, we produce our own media to provide a working class trans and queer perspective as well as to foster unity between our community and the rest of the working class. As our organization evolves and grows, we further intend to develop street defense and volunteer security (Lavender Guardian) services — for example, as bodyguards for sex sellers, as watchmen for queer people subjected to doxxes and death threats, as security for pride parades or at protests, etc. In short, we hope to defend any queer or oppressed person or people under any threat from personal, state, or stochastic violence and to help organize these communities for their own collective self-defense.
